

Holman's Training and Certification Platform is centered on a proprietary cloudDVD delivery vehicle; a cloud-based training system which leverages contemporary technology built to revolutionize professional training. The platform enables Holman's and our customers create, publish and distribute professional, video-based training and certification content. Fast, flexible, affordable, scalable and efficient.

Training content delivery options	Purchasing options
1. Per Individual Course Title	1. Contact Holman's
2. Quantity of training course units	2. Visit our online e-store

- Can be accessed from any computer connected to the internet (as well as from tablets and most modern smart phones).
- The cloudDVD interface mimics a classroom training environment, bringing the instructor to the student - at a fraction of the cost.
 - Courses are instructor-led, and are delivered via streaming HD video.
 - Customers do not need to travel to classroom locations.
 - All customers receive exactly the same training.
- Unique testing and certification tools make possible the creation of sophisticated certification programs. Certification exams can be fully/semi-automated or manually administrated, and the built-in recording tools, which allow administrators to ask, and test takers to answer, questions via video, allow administrators to truly assess whether a test taker meets the certification criteria.
- Other certification features include automated virtual proctoring, the ability for test takers to record proof-of-skill demonstrations, automatic certificate generation, integrated eCommerce support, public profiles which display customers'/employees' completed certifications and proof-of-skill demonstrations, randomizing of multiple choice alternatives and more.
- Advanced, proprietary authoring tools provide a unique ability to rapidly and affordably create cloudDVD-based training courses and certification exams, keep existing content up to date, and supplement the video-based content with virtually anything in any digital format (text, graphics, downloadable files etc.).
- A constantly growing course catalog of stock training content.
 - Fully-automated online sales interface.
 - eCommerce tools let customers purchase content in an on-demand fashion
- Easy-to-use, extremely flexible distribution tools for administrators.
- Training content can be used for start-to-finish training purposes, as well as serve as an on-demand, always accessible, reference library.
- Extensive reporting capabilities.
 - Administrators can effortlessly track the usage of individual users as well as that of larger groups of users. The data can be broken down by groups of training courses, by single training courses or even by specific sections of a training course.
- Unrivaled search capabilities.
 - Every word uttered in a video, as well as every word on a page or in a document, is indexed and searchable.
- Multi-language support.
 - English, Spanish, French, German, Italian, Portuguese and Chinese subtitles can be made available for any cloudDVD-based video.
