

Why use SITEOPS?

- Save time on conceptual layouts
- Provide 10 or more layouts while your competition does only one
- Unlimited design revisions cost you zero!
- Reduce design revision time by hours to days
- Help your clients make better decisions faster
- Gain a competitive edge with a unique, patented business tool
- Produce more conceptual layouts with grading plans and takeoff costs, with minimal resources
- Web-based software – no hardware requirements or IT impact
- Harness the power of “What if?”
- Know the cost of pursuing LEED certification points, quickly try out options for winning more points
- Spend more time on problem solving vs. drafting – no more drawing and counting parking spaces!
- Designs can be imported and exported in DWG format. SITEOPS file outputs can be used in AutoCAD, Civil 3D, Revit, LDD and Microstation, Paydirt & Agtek

Increase your productivity and win business... that's why!

- Provide your clients with better, faster results than your competition
- Optimize projects stalled due to funding – shed \$300K-\$1 M from the budget and push it through
- Show clients their sites in real time – “wow” them with quick design revisions and grading plans
- Complete \$1500 to 2000 worth of drafting work in seconds, for pennies
- 5-day \$25,000 proposals now can be done in hours – bid 5 projects per week, not just 1
- Value-engineer sites in the preliminary stages of projects
- Process preliminary project sites elsewhere in the country without leaving your office (an additional revenue stream) – no license needed
- Grade a previous project for a developer to show how much money was left on the table , and show him that your firm’s expertise on SITEOPS means savings to him/her
- Provide more layouts and options, including budget cost report and grading plan, than your competition
