

Bring Your Documents to Life...

With Electronic Document Management Services from Holman's.

You've been hearing about it for years – the promise of the paperless office. But did you know that for many businesses right here in Nevada, the promise is becoming a reality?

Thanks to Holman's and Laserfiche **Electronic Document Management** software, companies in the architectural, engineering, construction, legal, medical and financial fields are no longer buried under an avalanche of paperwork.

More than a storage system, Laserfiche is an integrated document management solution that lets you quickly and easily capture, index, search, retrieve, distribute, route, archive and track your documents and records in a secure environment. With Laserfiche from Holman's, you'll be able to:

- Instantly locate virtually any document regardless of format or size
- Reduce storage space and paper-handling costs
- Enhance operational efficiency across all departments
- Simplify and decrease the costs of regulatory compliance
- Improve disaster recovery and business continuity
- Minimize filing errors and document loss

Engineered to deploy in days rather than weeks, Laserfiche delivers a fast return on your investment. And because Laserfiche follows familiar Microsoft Windows conventions, your staff will become proficient in a relatively short period of time.

Perfect for offices of 5 to 250 people, Laserfiche has an affordable system that's just right for you. With more than 30 years serving the Southern Nevada market, Holman's of Nevada has the experience and know-how to make your Laserfiche decision as turnkey as possible. From installation and training to maintenance and support, we'll be there before, during and after implementation.

For more information on custom Laserfiche **Electronic Document Management** solutions, contact a Holman's advisor today.
