

Your Computer Network is at Risk...

...from hackers, spammers, spies, viruses, even your own employees.

People put bars on their windows, install alarm systems in their offices and buy guard dogs for perimeter security. But Internet protection is still overlooked, especially within small-to-medium sized businesses.

Can your business survive an Internet attack? Even if you have an internal IT department, chances are they're too busy managing your system to deal with the time-consuming complexities of network security.

That's where Holman's of Nevada comes in. Our proven **12-Point Internet Protection Program** is the most comprehensive in the industry.

- A clear and understandable written security policy
- Monthly or quarterly vulnerability assessments
- Updated/Secure patches and remote management
- Multiple redundancy: High-availability and WAN-WAN fail-over
- Grouping of divisions/prioritizing access
- Content filtering
- Integrated anti-virus and gateway anti-virus
- Log reporting for management team
- Anti-SPAM/Anti-spyware
- Tele-commuter/Road warrior security
- Wireless access point security
- Updated ICSA/IPsec firewall and intrusion prevention

Only Holman's of Nevada provides the **12-Point Internet Protection Program**. It will save your company money, time and headaches. Call today for more information and to schedule your free, no-obligation Internet Vulnerability Assessment.
